Wilhelm Roux's Archives of Developmental Biology

The Archiv für Entwicklungsmechanik was founded in 1894 by *Wilhelm Roux*. Vols. 1–43 (1918) Leipzig, Engelmann. From Vol. 44 called Wilhelm Roux's Archiv für Entwicklungsmechanik der Organismen, Organ für die gesamte kausale Morphologie, Berlin, Springer, Vols. 52/97, in a transition volume in 1923. From Vol. 98 to Vol. 104, combined with the Archiv für mikroskopische Anatomie founded in 1864 [till 1876 (Vol. 13) edited by *M. Schulze,* Vol. 13, No. 4 to Vol. 35 (1890) edited by *La Valette St. George, W. Waldeyer,* Vols. 36 to 43 (1894) edited by *O. Hertwig, La Valette St. George, W. Waldeyer,* from Vol. 44 as Archiv für mikrobiologische Anatomie und Entwicklungsgeschichte. Vols. 77–95 (1910–1922) in two sections Bonn, Cohen]. From Vol. 96 Berlin, Springer. Vols. 98–104 (1925) combined with Roux's Archiv and again published separately from 1925 as Zeitschrift für Zellforschung, Vol. 2 and following. Vols. 105–130 as Zeitschrift für wissenschaftliche Biologie, Abteilung D, edited by *Wilhelm Roux, H. Speman, W. Vogt, B. Romeis.* From Vol. 131 (1933) under the single title. From Vol. 143 (1947) Berlin, Springer, and Munich, Bergmann. From Vol. 181 (1977) Heidelberg, Springer.

The exclusive copyright for all languages and countries, including the right for photomechanical and any other reproductions, also in microform, is transferred to the publisher.

The use of registered names, trademarks, etc. in this publication does not imply, even in the absence of a specific statement, that such names are exempt from the relevant protective laws and regulations and therefore free for general use.

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin it is recommended that he contacts Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

Die in der Zeitschrift veröffentlichten Beiträge sind urheberrechtlich geschützt. Alle Rechte, insbesondere das der Übersetzung in fremde Sprachen, sind vorbehalten. Kein Teil dieser Zeitschrift darf ohne schriftliche Genehmigung des Verlages in irgendeiner Form – durch Fotokopie, Mikrofilm oder andere Verfahren – reproduziert oder in eine von Maschinen, insbesondere von Datenverarbeitungsanlagen, verwendbare Sprache übertragen werden.

Auch die Rechte der Wiedergabe durch Vortrag, Funk- und Fernsehsendung, im Magnettonverfahren oder ähnlichem Wege bleiben vorbehalten.

Fotokopien für den persönlichen und sonstigen eigenen Gebrauch dürfen nur von einzelnen Beiträgen oder Teilen daraus als Einzelkopien hergestellt werden. Jede im Bereich eines gewerblichen Unternehmens hergestellte oder benützte Kopie dient gewerblichen Zwecken gem. § 54 (2) UrhG und verpflichtet zur Gebührenzahlung an die VG WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, von der die einzelnen Zahlungsmodalitäten zu erfragen sind.

Autoren dieser Zeitschrift können unter gewissen Voraussetzungen in die Individualausschüttung von Mitteln aus der Bibliothektantieme und dem Fotokopieraufkommen mit einbezogen werden. Genaue Informationen erteilt die Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2.

Die Wiedergabe von Gebrauchsnamen, Handelsnamen, Warenbezeichnungen usw. in dieser Zeitschrift berechtigt auch ohne besondere Kennzeichnung nicht zu der Annahme, daß solche Namen im Sinne der Warenzeichen- und Markenschutz-Gesetzgebung als frei zu betrachten wären und daher von jedermann benutzt werden dürften.

Instructions to Authors

1. **Manuscripts** should be submitted **in duplicate** with two copies of tables and figures.

2. The **text** should be concise and carefully prepared to reduce corrections in proof. Authors will be charged for any changes introduced after the manuscript has been set in type.

3. Only papers in **English** will be accepted, thus ensuring the widest possible audience. Authors whose English is not native are urged to have their manuscripts checked by other scientists who are familiar with the field and whose English is native.
All manuscripts are, in any case, subject to copy editing and will, if necessary, be returned to the authors to answer open questions or to supply missing information before being sent to the printer.
When corrections are extensive, the author is responsible for having the manuscript retyped.

4. **Manuscripts** should be typewritten, double-spaced throughout (including References, Acknowledgements, Footnotes, Tables, Figures, and Legends) on sheets of uniform size, preferably no larger than DIN A4 (approximately 21×30 cm) with a 5-cm wide margin on the left. The desired position of figures and tables should be marked in the left-hand margin of the text.

5. The **title page** should bear:
   a) the title, concise but informative;
   b) the complete name(s) of the author(s) with first and middle names spelled out in full;
   c) the name of the institution where the work was carried out given either in the language of the country of origin or in the language in which the manuscript is written;
   d) a running title of no more than 72 letters including spaces;
   e) the address to which proofs should be sent.

6. **Summary.** Each paper must be preceded by a summary of the most important results in no more than 250 words.

7. **Key words.** Immediately following the English summary no more than 5 key words should be given. They should be taken from *Index Medicus* (Medical Subject Headings) or, failing this, be composed by analogy on the same principle.

8. The **Introduction** should be brief and should state the purpose of the work in relation to other work in the same field. It should not present an extensive review of the literature.

9. **Materials and Methods** should provide enough information to permit repetition of the experimental work.

10. The **Results** should be given concisely. Tables and figures should not illustrate the same results. The place where they should appear should be indicated on the left-hand margin of the manuscript. The **Discussion** should deal with the interpretation of the results and not recapitulate them. It may often be advantageous to combine **Results** and **Discussion** in one section.

11. **Small print.** Historical Reviews, Material and Methods, Protocols, and other secondary matter should be marked for small print.

12. **Special indications.** Genus and species names should be underlined once for italics. Words the author wishes to emphasize in the body of the text may also be set in italics.

13. **Footnotes** other than those referring to the title should be numbered consecutively and placed at the foot of the manuscript page on which they belong.

14. **Bibliographic citations** in the text should be given in parentheses (Child, 1941; Godwin and Cohen, 1969; MacWilliams et al., 1970), except when the author is mentioned, as for example, "and the study of Hillman and Tasca (1977)."

References to unpublished works should be kept to a minimum and mentioned only in the text itself in parentheses.

References to published works are given at the end of the text in alphabetical order according to the first author and styled as follows:

Periodicals: Name(s), initials, year of publication in parentheses, full title, journal title as abbreviated in *Index Medicus,* volume number, first and last page numbers. *Example:*
Garcia-Bellido A, Merriam JR (1969) Cell lineage of the imaginal disc in *Drosophila* gynandromorphs. J Exp Zool 170:61–76

Books: Name(s), initials, year of publication in parentheses, full title, edition, volume number, name of publisher, place(s) of publication. *Example:*
Meltzer YL (1971) Hormonal and attractant pesticide technology. Noyes Data, Park Ridge, New Jersey

Multiauthor books: Name(s), initials, year of publication in parentheses, full title. In: name(s) and initial(s), of editor(s), the abbreviation ed(s) in parentheses, name of publisher, place(s) of publication, first and last page numbers. *Example:*
Pittendrigh CS (1965) On the mechanism of entrainment of a circadian rhythm by light cycles. In: Aschoff J (ed) Circadian clocks. North-Holland, Amsterdam, pp 276–297

References by the same author(s) are arranged chronologically. If more than one reference by the same author(s) published in the same year is cited, use a, b, c after the year of publication in both text and list.

15. **Tables** should be typed on separate pages and numbered in the order in which they are mentioned in the text with Arabic numerals. They should be comprehensible without reference to the text. Conditions specific to particular experiments should be stated above the tables to which they refer and below the headings. Units in which the results are expressed should appear at the top of each column. Footnotes to tables should be avoided.

16. **Figures.** Number and size should be kept to the minimum required for documentation of results. Duplication of data in figures and tables is not acceptable. Figures should be mentioned in the text and should all be numbered with Arabic numerals. The back of each figure should be labelled lightly in soft pencil to show the top of the figure, the author's names, and the figure number. For each figure a brief descriptive legend should be given, but explanations of figure should not be repeated in the text. The legends should be arranged in sequence at the end of manuscript.

The *figures* with legends should either match the size of the column width (8 cm) or the printing area (17×22.7 cm).

Line Drawings: should be submitted twice the original size drawn with Indian ink on Bristol board or blue coordinate paper. High quality reproductions as glossy prints are also acceptable. Thickness of lines, size of symbols, and captions should be chosen so that they are still legible after reduction.

Halftone Illustrations: should be submitted in sharp focus and as rich in contrast as possible. They should be trimmed at precise right angles and whenever possible assembled as plates in 17×22.7 cm format. Scales and captions should be carefully placed on the figures or may be given on a transparent cover sheet.

Since the journal is not subsidized in any way, the authors are expected to participate in the cost of reproduction, if the number of halftone illustrations is excessive. Color prints are reproduced at the authors' expense.

17. **Offprints.** Fifty (50) offprints of each paper are supplied **free of charge.** Additional offprints can be purchased in lots of one hundred, provided the order is received with the corrected proof.

18. **Short Communications** presenting results of special interest will be published as fast as possible. These short reports comprising up to 4 printed pages (1 printed page = 3 DIN A4 page typed with one and one-half line spacing) may include one table and one figure or two of either (Two tables or two figures). Please send Short Communications manuscripts to
Professor Rolf Nöthiger,
Zoologisches Institut der Universität,
Winterthurerstr. 190, CH-8057 Zürich,
Switzerland.
To increase publication speed, no proofs will be sent to the authors. Manuscripts must therefore be ready to print.

Manuscripts are accepted by all members of the Editorial Board.
